Counterparty & Relationship Check

ILLUSTRATIVE PRODUCT DECISION GUIDE | PUBLIC-SOURCE AND SERVICE METHODOLOGY

No completed client matter is represented. This document demonstrates questions, evidence requirements, limitations and possible deliverables. It contains no verified findings about a named buyer or company. A matter, source access, fixed fee and timing require separate written acceptance.

---

1. Cover copy: question and promise

Counterparty & Relationship Check

Counterparty and association decision: Which official opportunities, awards and contractors exist in public records?

Use this review when: RFP, contract renewal, new award or public-spending question.

Target reader: Government contractors, bid teams and procurement advisers.

Illustrative subtitle: A clearly bounded external-evidence review identifying what original records substantiate, which claims are contested and what the client must request before relying on an assertion.

2. The buyer decision and research boundary

The decision owner must resolve: **Which official opportunities, awards and contractors exist in public records?** The matter is activated by a documented event such as **rfp, contract renewal, new award or public-spending question**. This specimen is intentionally subject-neutral. For the real commission, the research team must insert the actual named entity, decision date, jurisdiction, exact wording of the challenged claim and period before claiming anything factual.

Agreed scope model: Named entity and up to five related organisations or responsible entities identified from lawful records.

What is not automatically included: unbounded jurisdictions, confidential database access, professional regulated opinions, private surveillance, hardware or onsite testing, urgent escalation and any undisclosed third-party subscription costs.

3. What the buyer provides before instruction

- Exact name and identifiers of the relevant company, asset, product, person or project and its jurisdiction.
- The decision they must make, their deadline and the particular assertion or document that prompted it.
- Lawfully sharable materials, with any personal and confidential information minimised.
- Details of known adverse records, disputes and contradictory accounts, rather than a one-sided brief.
- Approval of the written scope, access conditions, final fee, permitted reliance and independent reviewer.

4. Investigative questions prepared for the real commission

- Which official opportunities, awards and contractors exist in public records?
- Which SAM.gov contract notice establishes the relevant subject, version and reporting period?
- Could solicitation confused with award overturn the decision-relevant statement?
- What original USAspending award supports an independent cross-check rather than repeating the same source?
- Which dated records would distinguish subcontractor role unsupported from a genuine discrepancy?
- What source result would justify a specialist referral rather than a research conclusion?

5. Evidence acquisition order and verification method

- **Resolve the subject.** Start with `SAM.gov contract notice` and capture issuer, entity match, record date, retrieval timestamp and original identifier.
- **Triangulate.** Compare `USAspending award` against the first source, testing whether both genuinely derive from independent originals.
- **Establish sequence.** Examine `entity registration` and order assertion, contemporaneous record, amendment and current status.
- **Seek negative evidence.** Test `solicitation confused with award`, `subcontractor role unsupported` and `award amount vs actual spending` with documented competing hypotheses.
- **Document the cutoff.** Name what is inaccessible, subscription-controlled, outdated or outside jurisdiction, and stop when the evidence cannot support more.
- **Human review.** Route legal, audit, security, engineering, medical, valuation or licensing questions to an authorised professional if applicable.

Why an evidence analyst is involved: Reconcile public solicitation data, award facts and contractor identifiers. The value exists only when the recorded work improves the buyer's decision beyond readily accessible search results, an internal analyst or a self-service AI summary.

6. Ready-to-typeset example evidence matrix

Question/claim; First applicable original record; Best competing evidence; Illustrative state before casework; Next evidence action

Identity, legal capacity and exact subject; `SAM.gov contract notice`; Alias/period mismatch; Not yet examined; Obtain verified legal or asset identifier

Main decision assertion; `USAspending award`; `solicitation confused with award`; Not yet examined; Request original dated statement and counter-record

Material event timing; `entity registration`; `subcontractor role unsupported`; Not yet examined; Reconcile dated event and publication chronology

Adverse exception; Independent contrary source; `award amount vs actual spending`; Not yet examined; Ask precise targeted contradictory question

Meaning of statuses (for the eventual real report):

Evidence state; Meaning for the decision owner

Supported; Applicable original records support the narrowly worded claim for the stated time and entity.

Partially supported; Some elements are established, while material qualifiers, scope or periods remain open.

Contradicted; A more reliable applicable record conflicts with the proposed assertion.

Unresolved; Accessible evidence is absent, ambiguous, outdated or conflicting; further documents are required.

Outside mandate; The question requires a reserved professional function or additional agreed research.

7. Concrete specimen outputs (without fictional findings)

Output committed for this product: Evidence-supported relationship diagram, mismatches, ownership questions and exposure caveats.

Suggested report artifacts:

- **Award Trace And Timeline**: rows for evidence question, entity match, issuer, record identifier, effective date, retrieval date, contrary document, confidence explanation and reviewer disposition.
- **Bidder Identity Brief**: a table distinguishing event dates, record publication dates, claim dates, subsequent amendment and unresolved chronological gaps.
- **Contract Signal Monitor**: a controlled clarification list addressed to the relevant source owner or instructing professional.
- A concise executive decision note stating what may be relied upon for the specified purpose and which matters remain unresolved.

Editorial visual specification: Include one actual evidence matrix or original-record timeline only when underlying evidence exists. Never insert decorative charts, fabricated relationships, arbitrary ratings or imaginary completed cases.

8. Source acquisition catalogue for this offer

These are real portals and competitor-method references to evaluate, not proof of any specific subject. Access, freshness, jurisdiction and licensing must be rechecked during production.

Ref; Primary source / comparator; Link; Evidence limitation and status

SEC-EDGAR; U.S. SEC: EDGAR search for public company filings; https://www.sec.gov/search-filings; WEB CHECKED 2026-10-12. Filings do not cover all private companies or guarantee current beneficial owner identity

S17; SAM.gov federal contracting; https://sam.gov/contracting; REGISTER STARTING POINT; NOT NEWLY RECHECKED. Source candidate; subject relevance, date and access must be verified case-by-case.

S18; USAspending government awards; https://www.usaspending.gov/search; REGISTER STARTING POINT; NOT NEWLY RECHECKED. Source candidate; subject relevance, date and access must be verified case-by-case.

9. Deliberately adverse questions and professional boundary

- If `solicitation confused with award`, does the strongest original record still justify the same assertion?
- Could `subcontractor role unsupported` result from a date mismatch, name collision, incomplete publication or source-update lag?
- What would demonstrate `award amount vs actual spending` and require a 'cannot determine' outcome?
- **Professional boundary:** No bid success guarantee, governmental agency role or improper influence.

10. How a reader commissions the real product

The reader identifies the subject, decision date and three most material questions and requests a **written scope and fixed fee** through the existing website pathway: `/specialist-divisions/public-sector-government-contracting-procurement-intelligence/offers/counterparty-network-check/`. An initial enquiry must not contain confidential attachments. No work begins, payment occurs or information is treated as professionally verified until human acceptance, conflicts, lawful sourcing, pricing and the secure handoff process are complete. This illustrated manuscript does not constitute an offer to undertake regulated activity.

11. Production / reliance quality checklist

- Confirm the appointing client, exact research question, relevant location, decision date, conflicts, privacy, sanctions and licensing.
- Check original source identity, authority, issue date, effective date, retrieval timestamp, version and lawful access.
- Reproduce important calculations and compare at least one plausible contrary explanation.
- Keep allegations, regulatory findings, historical claims and unresolved matches distinct.
- Mark each proposed finding supported, partially supported, contradicted, unresolved or outside mandate; include missing-source requests.
- Confirm that illustrations do not imply a real engagement, completed investigation, certified outcome or affiliation with named comparators.
- Obtain final human sign-off on accuracy, legal boundaries, confidentiality, claims and publication version before release.

Visual publication policy: When instructed to generate a PDF later, follow the approved Aperture PDF visual master, original approved brand art, document control page and separate final human sign-off. There is no PDF yet.

Professional boundaries: Independent research support only. No legal, tax, investment, audit, valuation, brokerage, investigation requiring a specific professional licence or regulated opinion is implied. No confidential material should be sent before instructions.
