

Mineral Processing Capacity Intelligence: Illustrative Evidence Brief

ILLUSTRATIVE SPECIALIST EVIDENCE BRIEF | PUBLIC-SOURCE AND SERVICE METHODOLOGY

No completed client matter is represented. This document demonstrates questions, evidence requirements, limitations and possible deliverables. It contains no verified findings about a named buyer or company. A matter, source access, fixed fee and timing require separate written acceptance.

Commissioned decision

This specialist review focuses on **Mineral Processing Capacity Intelligence**, within **Critical Minerals, Mining & Metals Intelligence**. The decision owner asks: **Are ownership, licensing stage, resource assertions and supply claims supported?** The specific fact being tested, relevant entity, territory and historical period must be defined before any casework.

Narrow first commission

Investigate one named subject, one agreed current-versus-historical claim, the most relevant USGS 2026 mineral tables and one independent cross-check. Stop if original records are unavailable or the decision cannot be resolved in the agreed scope.

Original-record plan

- Source the exact original USGS 2026 mineral tables and capture jurisdiction, publisher and date.
- Verify identity against local mining title register and document whether it is independent.
- Test resource confused with reserve as a rival explanation.
- Check the alternative permit not established rather than treating an unreturned search result as exculpatory.
- Ask whether offtake counterparty unclear would require the decision owner to commission a qualified specialist.

Illustrative two-page PDF composition

Page 1: Case-neutral purpose, exact research questions, allowed source universe and decision relevance; do not name a supposed real client.

Page 2: Source-to-question matrix with no fabricated findings, a material contradiction register, a precise request for the missing original records and reliance boundaries.

Specific deliverable tables: project claim trace, ownership/permit matrix, supply capacity evidence.

Example report table (empty until an authorised case)

Evidence question; Proposed source; What must be verified; Result

Which entity/asset is named?; USGS 2026 mineral tables; Exact identifiers and record period; Not investigated in this specimen

Does the claim survive a contrary source?; local mining title register; Independence, timing and scope; Not investigated in this specimen

What would change the answer?; project report; resource confused with reserve; Not investigated in this specimen

Applicable source portals

Ref; Primary source / comparator; Link; Evidence limitation and status

SEC-EDGAR; U.S. SEC: EDGAR search for public company filings; <https://www.sec.gov/search-filings>; WEB CHECKED 2026-10-12. Filings do not cover all private companies or guarantee current beneficial owner identity

S12; U.S. Geological Survey commodity summaries; <https://www.usgs.gov/centers/national-minerals-information-center/mineral-commodity-summaries/>; REGISTER STARTING POINT; NOT NEWLY RECHECKED. Source candidate; subject relevance, date and access must be verified case-by-case.

S13; USGS 2026 commodity data release; <https://www.usgs.gov/data/mineral-commodity-summaries-2026-data-release>; REGISTER STARTING POINT; NOT NEWLY RECHECKED. Source candidate; subject relevance, date and access must be verified case-by-case.

Buyer action and exclusions

- Reader: OEM procurement teams, minerals investors and project developers.
- Commercial trigger to check: Mineral export restriction, mine proposal or offtake review.
- Send the decision question and identifiers through the existing written-enquiry route; do not send restricted records by insecure email.
- **Professional boundary:** No reserve certification, resource valuation or geological professional opinion.
- Do not imply the claimed facts are proven, that this is a completed sample case, or that named competitors have endorsed Aperture.

Release quality controls

- Confirm the appointing client, exact research question, relevant location, decision date, conflicts, privacy, sanctions and licensing.
- Check original source identity, authority, issue date, effective date, retrieval timestamp, version and lawful access.
- Reproduce important calculations and compare at least one plausible contrary explanation.
- Keep allegations, regulatory findings, historical claims and unresolved matches distinct.
- Mark each proposed finding supported, partially supported, contradicted, unresolved or outside mandate; include missing-source requests.
- Confirm that illustrations do not imply a real engagement, completed investigation, certified outcome or affiliation with named comparators.
- Obtain final human sign-off on accuracy, legal boundaries, confidentiality, claims and publication version before release.

Professional boundaries: Independent research support only. No legal, tax, investment, audit, valuation, brokerage, investigation requiring a specific professional licence or regulated opinion is implied. No confidential material should be sent before instructions.
