

Buyer Support Programme Guide

Business Acquisition | Independent, human-led evidence research | Version 221 | 12 October 2026

Start with the smallest relevant research task

Explorer: freely available self-service checklists, buyer-stage questions and downloadable evidence examples. No account or membership payment is required.

A buyer can purchase or request a separately accepted evidence review without joining a programme.

Guided Search | pilot proposal | USD 249 monthly

Subject to actual launch approval: one buyer-specific buy-box profile, up to five documented candidates per month where adequate public sources exist, and two bounded written evidence questions.

This is not sourcing, procuring willing sellers, licensed brokerage, negotiation, financing or unlimited coaching.

Acquisition Partner | pilot proposal | USD 695 monthly

Subject to actual launch approval: Guided Search scope, up to four bounded written questions, a monthly decision note and one capped First Look assessment per month.

The First Look is not full diligence. Data access, legal, accounting, appraisal and specialist services are excluded unless separately approved.

How to join if and when pilots activate

The two paid monthly programmes are not open for payment or enrolment. Use the website enquiry to express interest and request a future availability notice. No automatic charge or obligation arises.

If launched, a written agreement must define monthly scope, response windows, capacity, renewal/cancellation and applicable professional or data costs.

Professional network and community status

A moderated private community and professional introduction programme are proposals in development, not active member entitlements. No guaranteed professionals, deal opportunities, financing or coaching sessions are promised.

Independent evidence boundary

We provide lawful, human-reviewed evidence and reliance limitations. We do not replace counsel, CPA/QoE, regulated valuation, licensed intermediary services or lender underwriting.
